

Transport solutions for the Oil & Gas industry.

Transportation requirements in the Oil & Gas industry can be unique and complex with highest safety standards and the need for specialized equipment. Operational conditions are difficult; the demands for performance and reliability are uncompromising.

As a pioneer in the region, Green Mission understands the requirements of your business and offers suitable transport solutions to fully support your business: To transport pipes, chemicals, drilling equipment, staff, fuel, water, and other materials to and from explorations and drilling sites, many of them in most difficult terrains and most remote locations.

Green Mission has become the leader in the region with a portfolio of trucks designed to endure such conditions with their sturdy, proven components. Each of our vehicles is developed, built and tested with daily use in mind.

(Hazardous good, Civil Defense Approval)

40FT Flatbed Trailer
(Hazardous good, Civil Defense Approval)

6 X 6 Sand FT 3 Axle Lowbed Trailer
With Hydraulic Ramp

Box Trailer

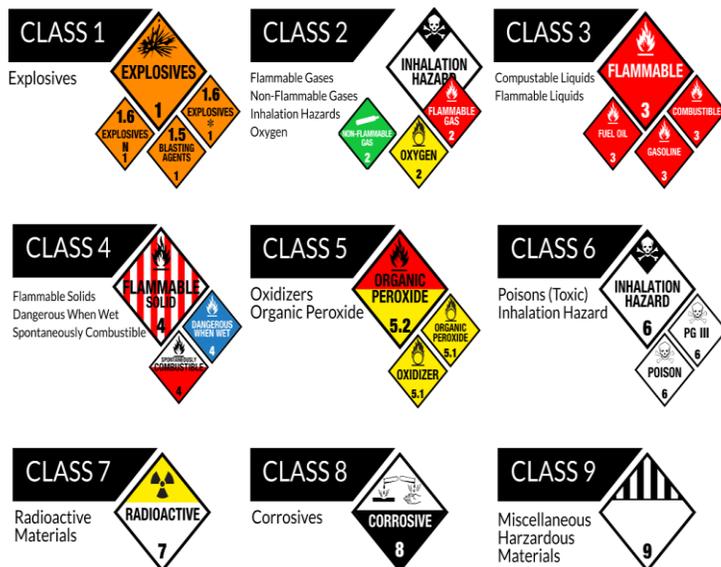

garbage Skip Crane

Hazardous Goods Transportation

Transport of hazardous goods (oils, gas, chemical products, radioactive substances) is the transit of substances with high risk to the environment and/or humans, or substances that can damage other materials and goods. The transport solution involves the implementation of adequate measures to ensure their transit in total security. Transportation may be by land, sea, waterways, rail or even by air.

Classes of Hazardous Goods / Transport Pictograms

In accordance with ADR, there are 13 classes of hazardous cargoes:

Compatibility with other substances
